MOULAY YACOUB

THE BENEFITS OF MOULAY YACOUB THERMAL WATER

- The Moulay Yacoub water starts at 1500 meter underground. It then runs from 1 to 6 kilometers in depth and crosses lands originated from Jurassic and Trias, and then it takes its source from Moulay Yacoub village, from the heart of the hills of Rif. The water flows at 54°C and then cool down to about 38°C before being used in our thermal centre.

The benefits of the thermal water of Moulay Yacoub are very useful in rheumatology, in oto-rhino-laryngologist pathologies, but also in the treatment of joint pain. It is also recommended for its soothing virtues, due to the healthy environment of Moulay Yacoub, which is far from any pollution or stressful everyday life.

On the rheumatology side, it particularly targets osteoarthritis and chronic tendonitis. In oto-rhino-laryngologist pathologies, the benefits of the thermal water of Moulay Yacoub are particularly noticed in the treatment of rhinitis, rhino-sinusitis, pharyngitis, tonsillitis, and bronchopulmonary diseases.
